

Clinical Test of Wrinkle Removal Product from SAFACURA

¹YEUNG Ming Fai

1. SAFACURA

Abstract

Wrinkle removal product from SAFACURA was shown wrinkles paler effect on volunteers and it was not shown any side effect.

Introduction

The demand for wrinkle removal cosmetics was increased rapidly. A clinical research on a wrinkle removal product from SAFACURA was carried out to test its efficacy and toxicity.

Material and Method

Wrinkle removal product was taken from SAFACURA. Tap water is used for dilution.

Ten ml of wrinkle removal product was added to a face plate. Water was added to dilute the product to the ratio of 1:20. The mixture was stirred thoroughly. The wrinkles on skin were washed by the mixture by 30 minutes twice a day (at 7 am and 10 pm) for 30 days. A photo was taken before washing the wrinkles on skin and another photo was taken after 30 days for comparison. The product was self-tested and tested for 10 volunteers.

Results

100% of volunteers were shown wrinkles paler effect on skin. The product was not shown any side effect on volunteers.

Conclusion

Wrinkle removal product from SAFACURA was shown wrinkles paler on skin and it was not shown any side effect.
