A Website, NPAlbum, was developed for Displaying Natural Products Illustration and Record

YEUNG Ming Fai
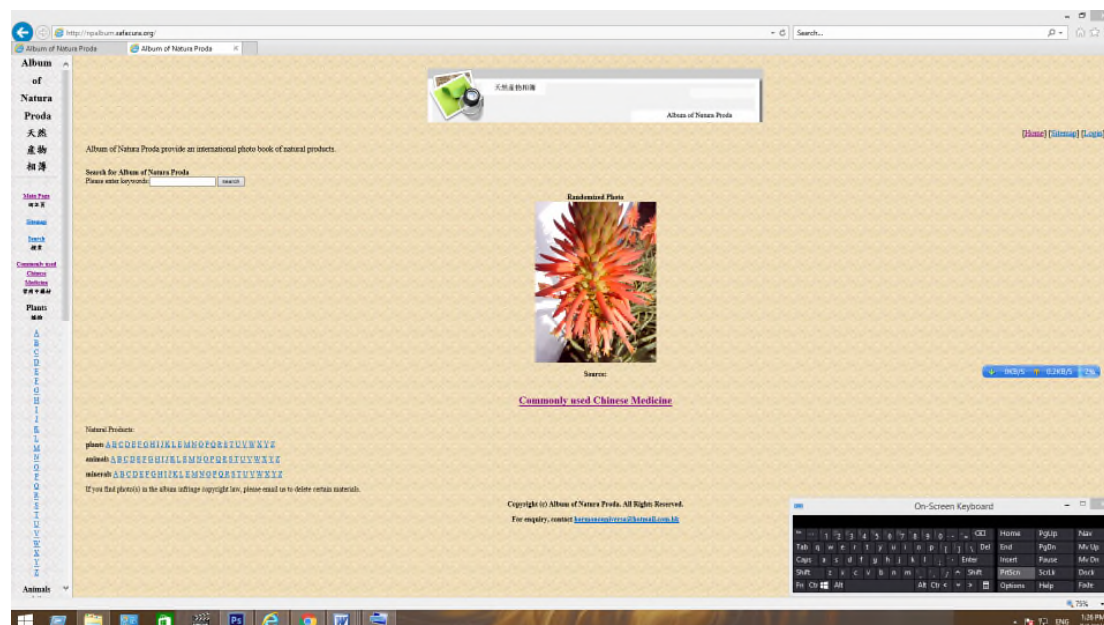

Abstract

A website template, NPAlbum (http://npalbum.safacura.org), was developed for Displaying Natural Products Illustration and Record.

Introduction and Content

A website template, NPAlbum (http://npalbum.safacura.org), was developed for Displaying Natural Products Illustration and Record. The main page is show on Figure 1. The natural products can be searched according to the alphabetical order or keyword search. After clicking 'Commonly used Chinese Medicine' on the left hand column, the page is shown on Figure 2. The commonly used Chinese Materia Medica is shown in alphabetical order. Choosing the selected Chinese Materia Medica, click on it. The demonstration is shown on Figure 3. It contains text, picture, 3D illustration 4D illustration as embedded video from Youtube. This means that the morphology, characteristics, composition and ingredients, medical usage and toxicity, etc., can be added to the website for worldwide people to view and search, in which this can help illustrate, distinguish and validate natural products.
